PLATEAU RESOURCES LIMITED

FRANK M MINE ANNUAL PROGRESS REPORT  
RECLAMATION

The 1980 off-set drilling was recontoured in August and seeded in November using a mixture of native and adapted species. Several sites that were reclaimed in 1978 and 1979 and were considered as probable problem areas were reinspected to check the revegetation. All were found to be responding as planned and the trend toward secondary succession appears to be adequately set.
